

## GSA Command & Control

### Mildenhall AFB

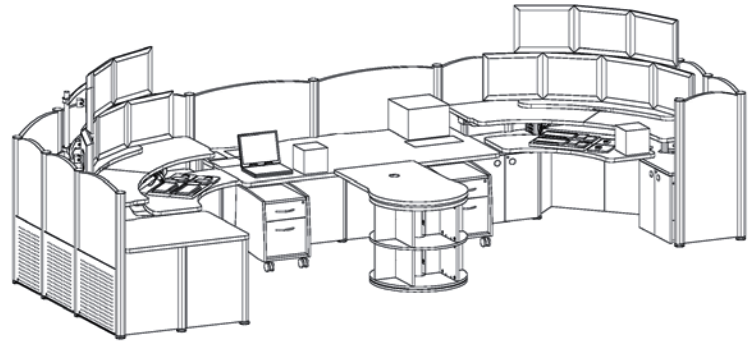

100th Air Refueling Wing  
Suffolk County, UK

#### Product Scope

Watson Product: Synergy 2 Center Lift and Linear Consoles with depth adjustment platforms installed in February 2011. The installation features a peninsula and rotating resources for extra storage and work surface.

Located on the east coast of the United Kingdom in Suffolk County, RAF Mildenhall is home to over 13,000 members of the United States Air Force, their family members, and civilian employees. Currently, the 11,000 square foot facility supports American Air Force and Navy operations almost exclusively. The 100 ARW provides combat support operations for U.S. and NATO-supported missions throughout Europe and Africa. To ensure that armed forces' personnel can be mobilized and deployed around the world without delay, the 100 ARW is manned 24 hours per day, 365 days a year.

The 100 ARW workstations are staffed by multiple controllers who need to adapt the space and equipment to meet changing needs over the course of two 12-hour shifts. Each console is manned by two controllers per day. The 24-hour use of the facility and lack of built-in adjustability resulted in deterioration of existing furniture pieces, posing health and safety concerns. Mildenhall turned to Watson for a solution.

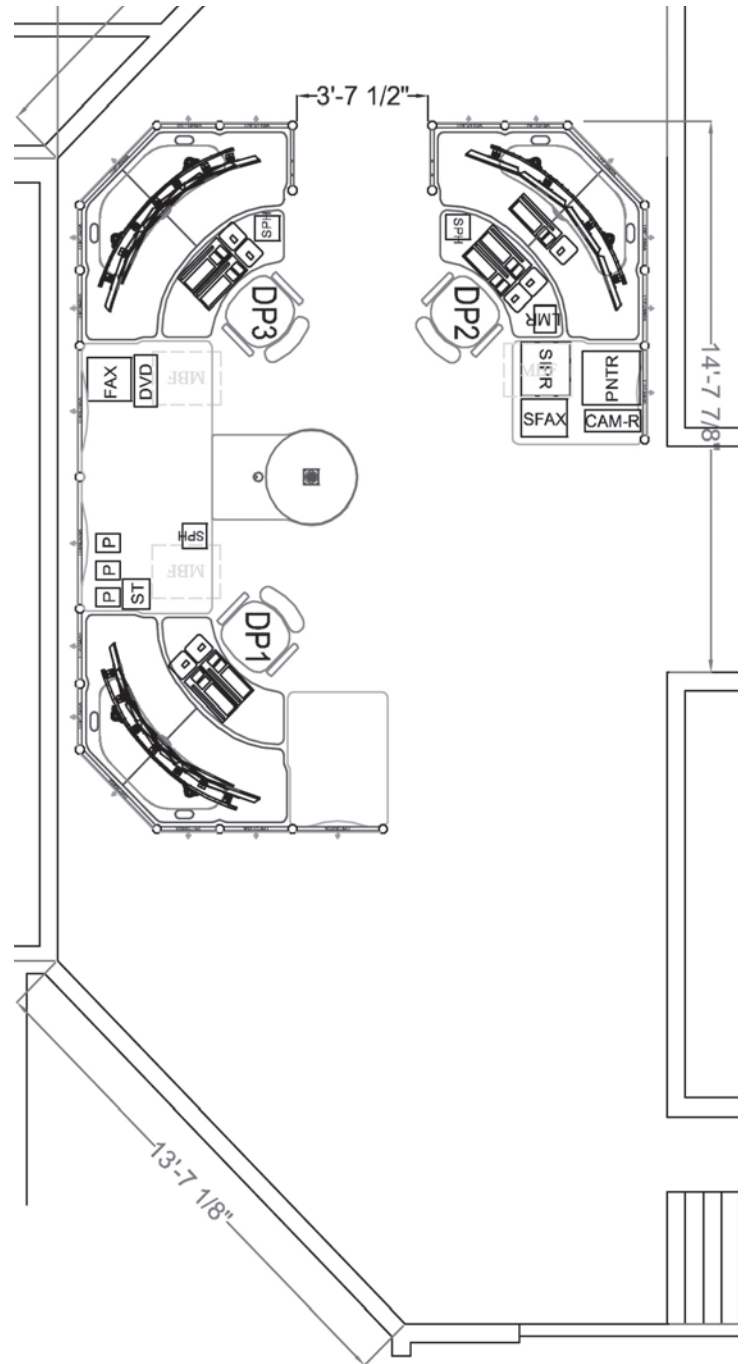

The Watson team suggested Synergy 2™ consoles - built to sustain 24/7 use and provide ergonomic support for the users. The height adjustable desks promote increased focus and attention during the course of a shift, and enhance ergonomic health when consoles are shared. Constructed with a solid steel core and heavy-duty aluminum posts, Synergy 2 consoles provide the ARW with a durable and user-friendly solution for their dispatch center.

Watson is dedicated to the quality and usefulness of its products. The overseas installation at RAF Mildenhall is an example of this commitment - to manufacture durable office desking and casegoods which promote increased function and efficiency through user satisfaction.

### Product Highlights

- **Made in the USA**
- **Sustainable Manufacturing Processes**
- **Solid Steel Core Construction**
- **Extruded Aluminum Posts**
- **Durable Laminate Finishes**
- **100% Recycled Fabrics on Textile Panels**
- **Lifetime Warranty on all Watson Manufactured Parts**
