

CRAFT LAMINATE

Watson Craft Laminate is a special applications product for those seeking a 'lived-in' or 'worn' look and feel. Unlike conventional laminate surfaces finished for maximum durability, Craft Laminate will naturally reveal signs of aging akin to artisan leather desks. A softer, matte finish bestows a refreshingly honest spirit on any product finished in Craft Laminate. This locally-sourced finish embodies Watson's commitment to environmental responsibility.

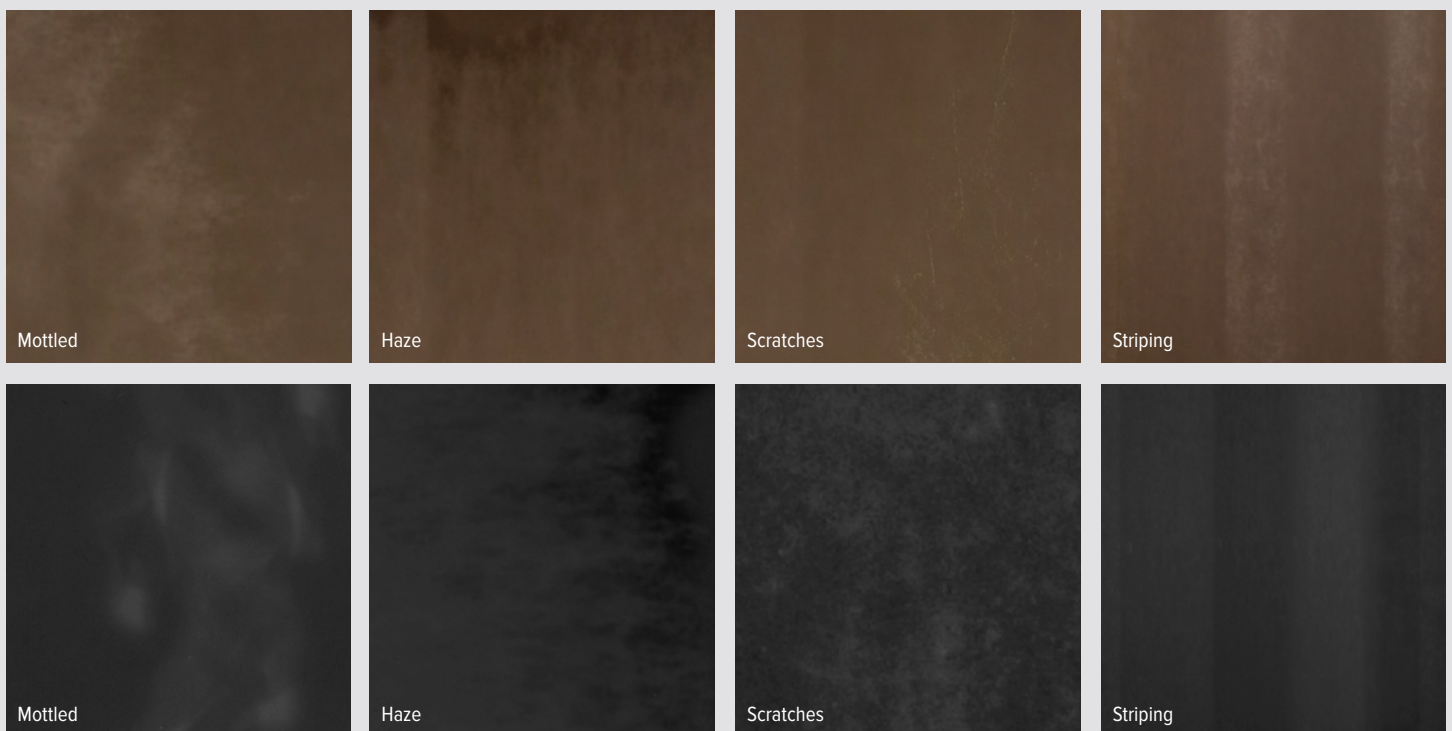

COLOR VARIATION

The acceptable color spectrum of Craft Laminate may vary slightly from sheet to sheet.

ROLLER MARKS & NATURAL BLEMISHES

Craft Laminate sheets often arrive with fine scratches and/ or visible roller marks as a result of the manufacturing process. Each sheet is unique from one another.

MATERIAL CHARACTERISTICS

Surfaces finished with Watson Craft Laminate will obtain a characteristic wear and aging not found in decorative high-pressure laminate (HPL) through scratching, spills and pen marks. Color and markings will be unique to each sheet and therefore Watson cannot guarantee consistent appearance for all surfaces.

CARE & MAINTENANCE

Craft Laminate may be cleaned with off the shelf non-abrasive cleaners (e.g., Windex) or mild detergent solutions. Due to the unique nature of Craft Laminate, it is not covered under Watson's Lifetime Warranty.
