ASSEMBLY

Edison Junior Rail

WARNINGS

WARNING - Risk of Fire or Electric Shock. It is possible for this office furnishing system to be connected to more than one source of supply. Disconnect all sources prior to any servicing. A single circuit shall not be powered by more than one source.

WARNING - Electrical connection between rail segments shall be disconnected prior to removal of a mechanical connection.

WARNING - The system may be supplied by a three phase power system with four individual circuits rated at 20 amps/120 volts maximum, or as permitted by local code.

WARNING - No more than 12 duplex receptacles shall be supplied by one circuit. (12 segments Two Duplex, 6 segments Four Duplex)

WARNING - For commercial use only.

NOTE - Installation must be in accordance with the National Electrical Code and local codes. Electrically interconnected tables need to be mechanically connected.

General Rail Assembly Notes

It is recommended to perform as much of the rail assembly upside-down, keeping in mind how many installers are available to flip the run right-side up once assembled.

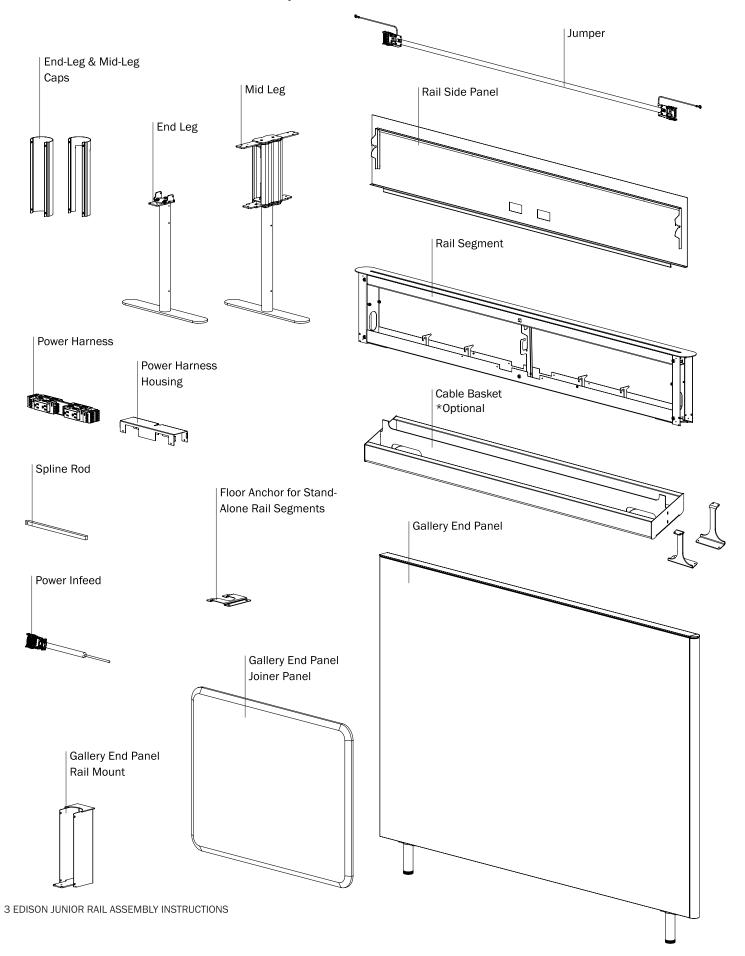

If 1 - 2 installers: flip the first rail segment upside down and complete steps 1 & 2. Then flip the rail right side up and continue with instructions, adding one segment at a time for step 3.

If 3+ installers: complete steps 1-4 with the rail flipped upside down. Once complete, flip right side up. The length of run will determine how many installers are needed to perform the flip.

Edison Junior Rail Components

Hardware

Screw SMS #10 x 3/4 Truss Head PH, Black (122875)

Screw M6-1.00 x 12MM BHSCS, Black (125285)

Screw M6 x 30MM BHSCS, Black (0002086)

8-32x1/4" Screw, Steel (121538)

18-8 Lock Washer #8 .34" OD (121406)

Screw M6 x 50MM Partial Socket, Black (0003010)

Screw Thread-Cutting M4 x 8MM FH PH, Zinc (0003016)

Floor Anchor Screw (48013)

Clip 5/8" Conduit, Black (391001)

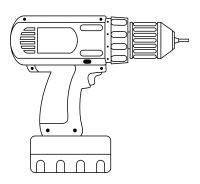

Coupler I Connect (053714)

M6 - 1.00 X 12MM BHSCS (125290)

Tools

Electric Drill

Phillips Drill/Driver Bit

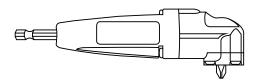

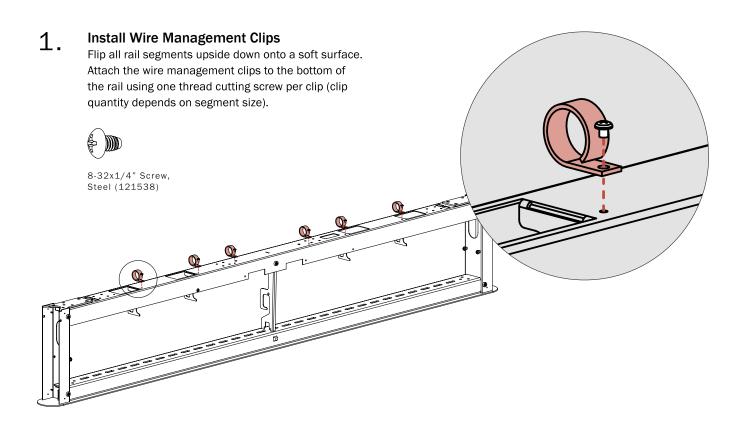

3mm Hex Drill/ Driver Bit

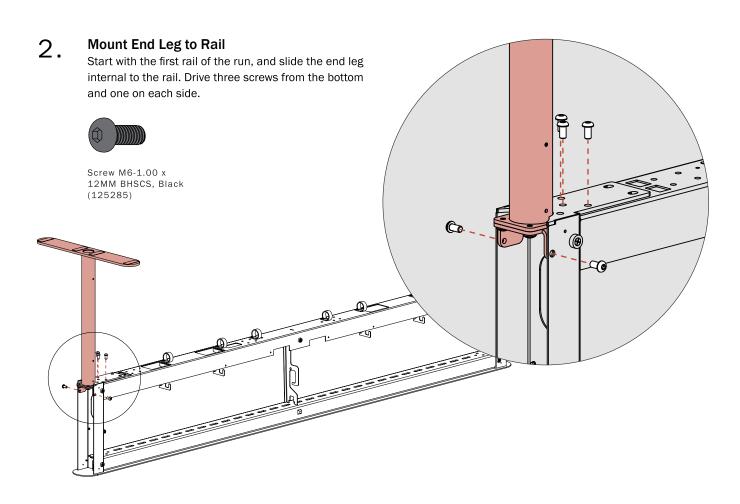

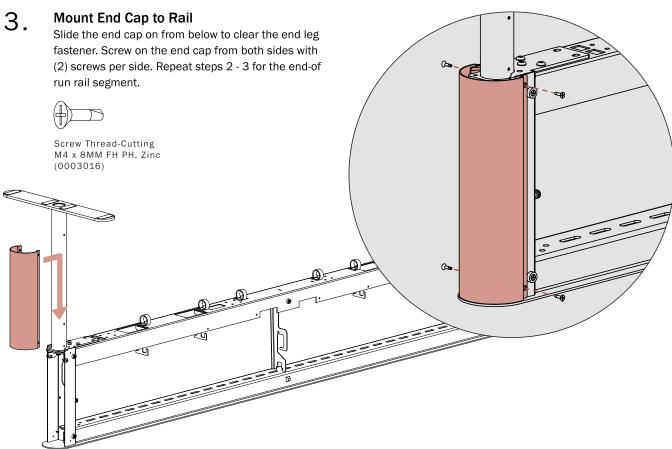

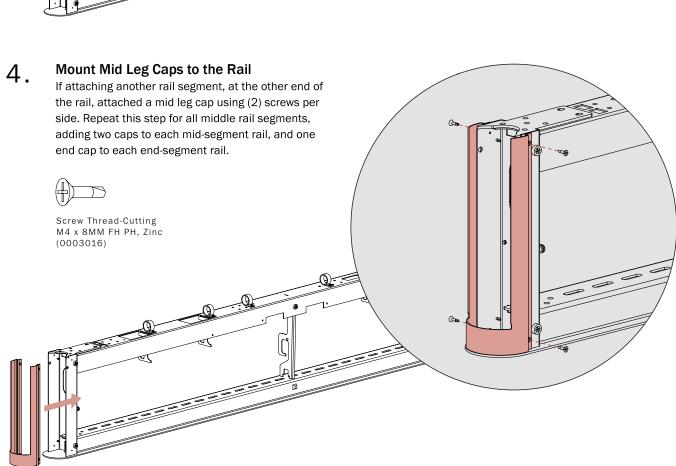

Additional tools such as a 90 Degree Bit and an 18" Extension are helpful for some steps

^{*}No torque or ball bits should be used

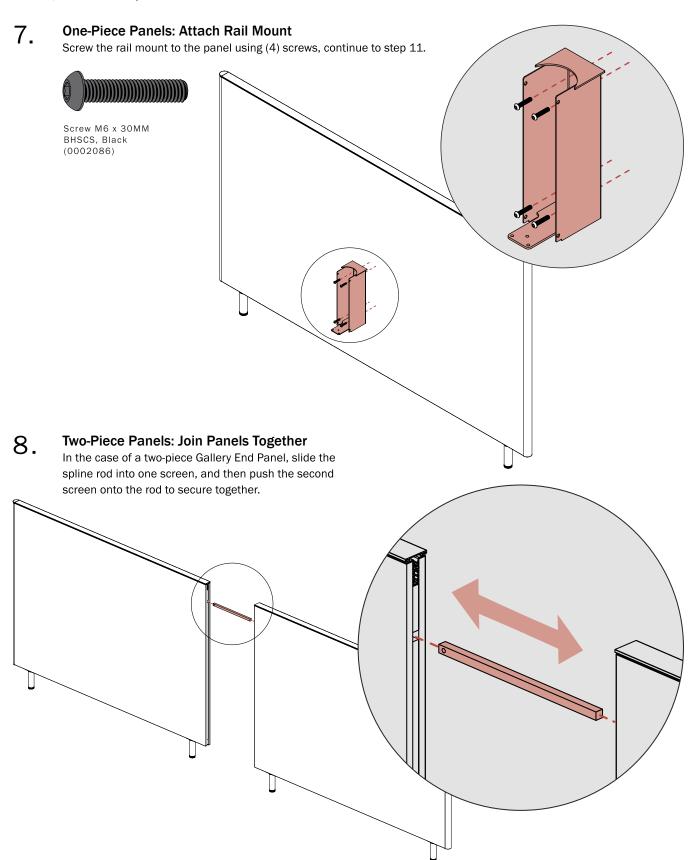

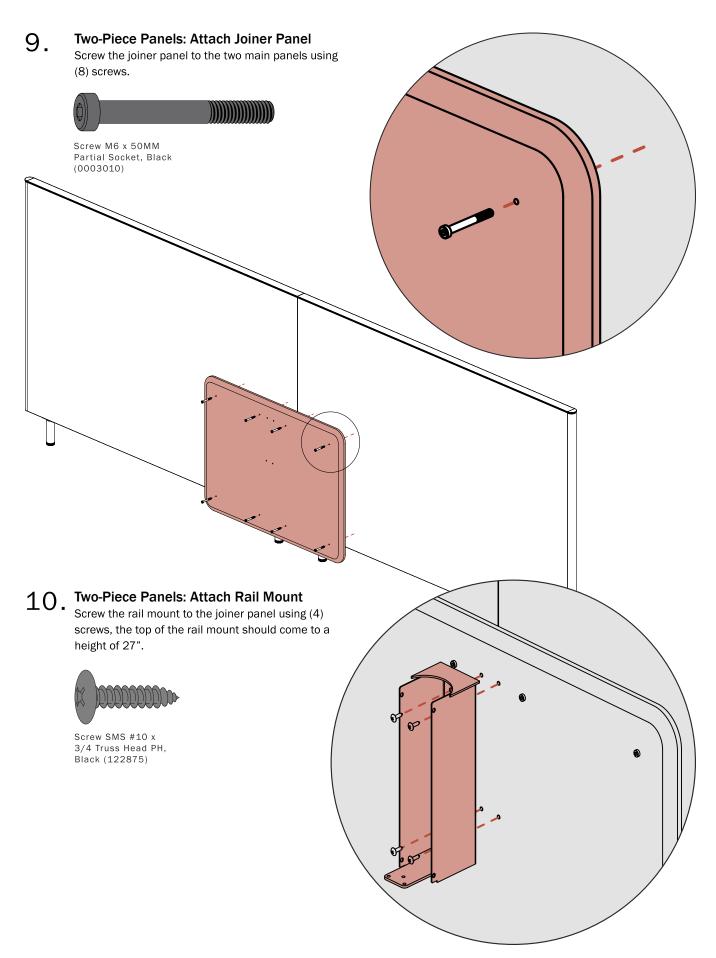

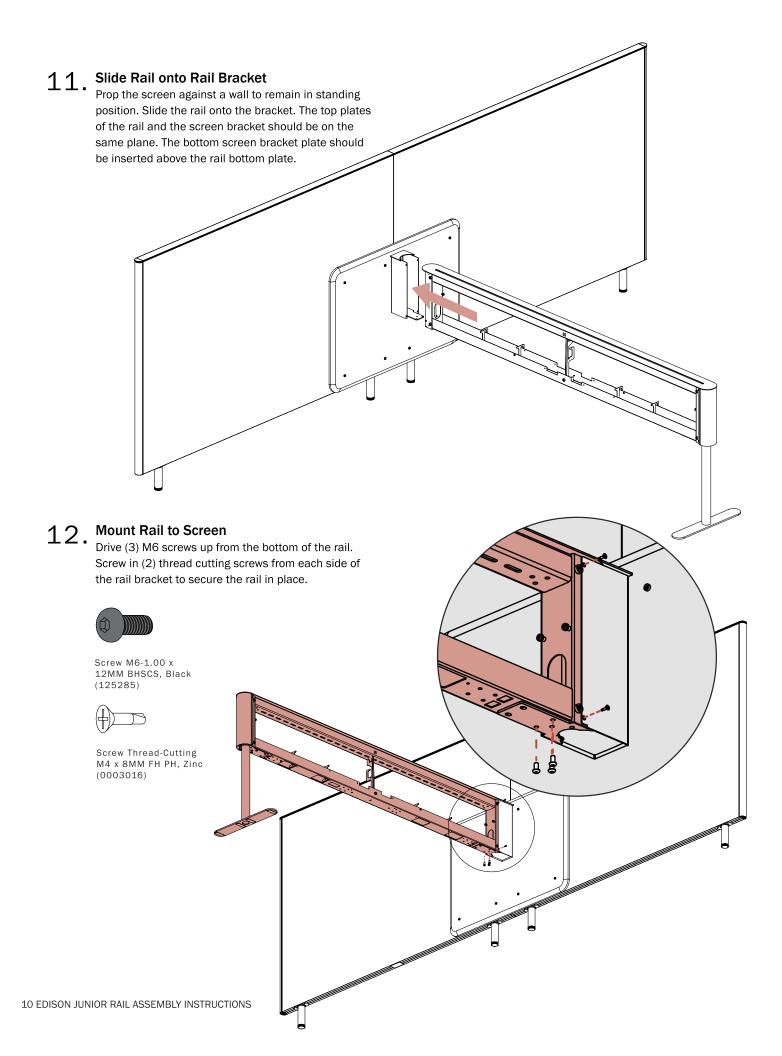

5. **Connecting Rail Segments** After installing the mid leg caps, slide the rails onto the mid leg assembly. The openings in the caps at the end of each rail segment should fit snuggly around the mid leg assembly brackets. The below example shows two end rail segments connected with one mid leg. 6. **Screw Mid Leg Onto Rails** Secure the mid leg to the rails using (6) screws on each side. Three screws are driven from the underside of the rail, and three from the underside of the rail interior for each side of the leg, as shown. The bottom plate of the leg sits internal to the bottom plate of the rail. Screw M6-1.00 x 12MM BHSCS, Black (125285)

Optional Gallery End Panel Assembly

If the customer ordered Gallery End Panels, assembly will take place at this step in the process. If no Gallery End Panels were ordered, continue to Step 13.

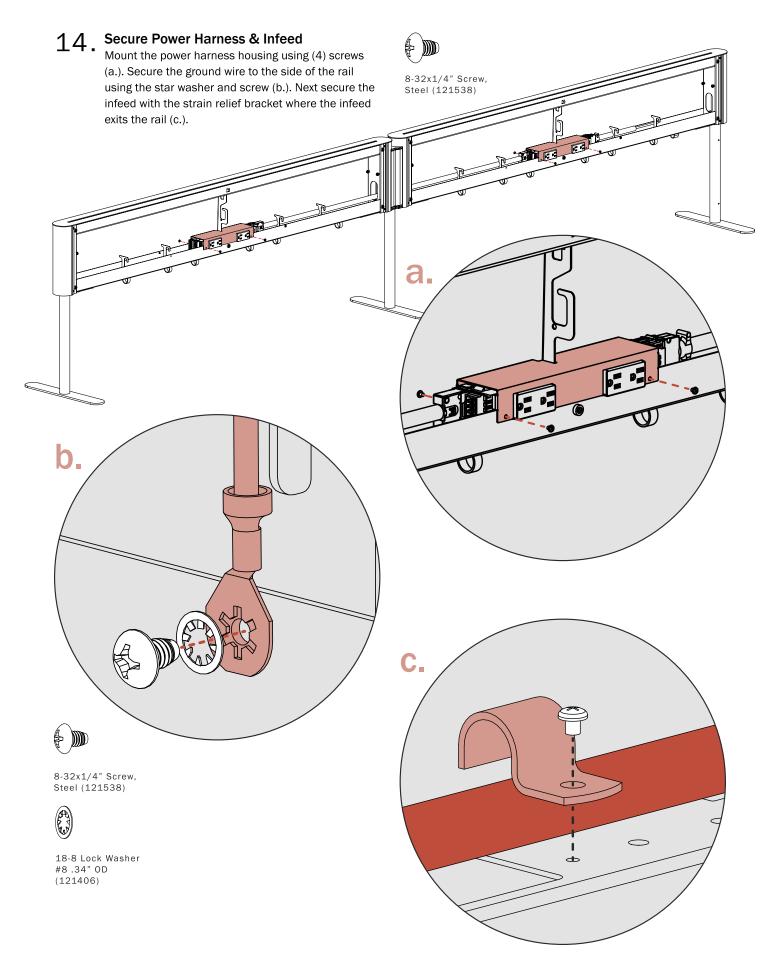

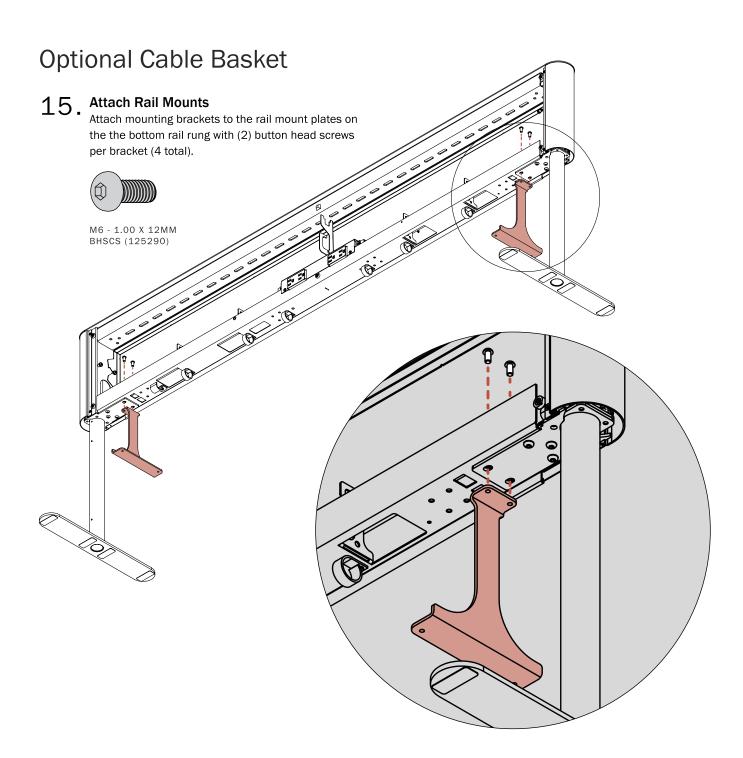

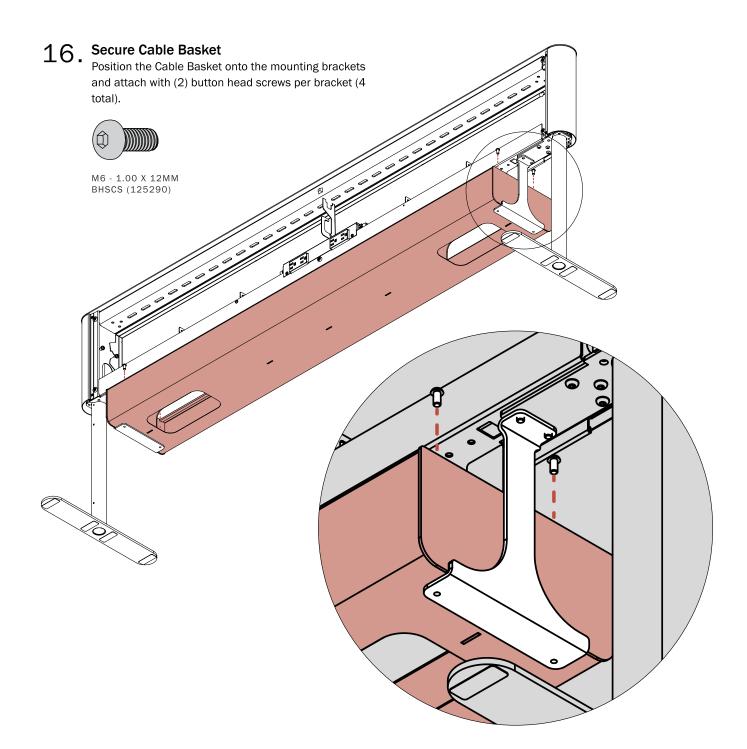

13 . Install Jumpers and Power Harness

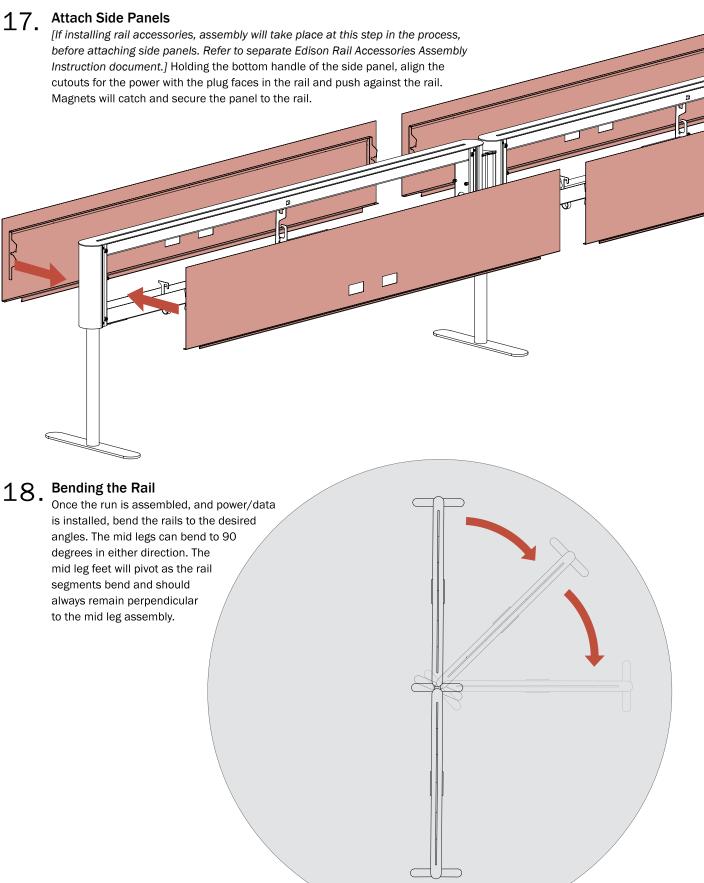

11 EDISON JUNIOR RAIL ASSEMBLY INSTRUCTIONS

Align power harness outlets with cutouts in the rail segment. Feed the infeed through the cutout in the bottom of the appropriate rail segment* and connect it to the power harness. Next feed the jumper through the mid leg and connect each end to each power harness. Jumpers only connect in one orientation: arrows on jumper and harness will align to indicate proper connection. Ensure the jumper plastic clips are engaging the harness lip to prevent disconnection. The mid leg must be straight at the time of routing the jumper through. * Infeed can go into any of the cutouts in the rail segment to power up a rail.

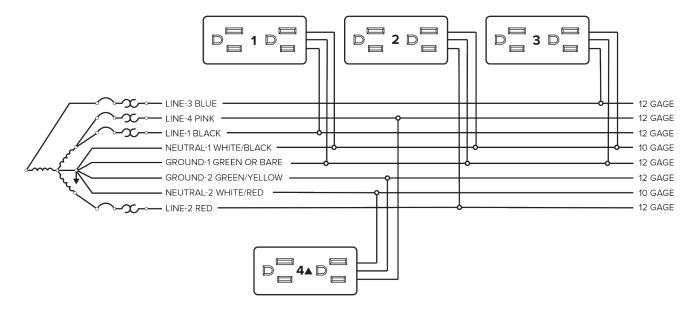

Loosen the two set screws on each leg, and the foot will spin freely and telescope in and out, raising and lowering that section of rail. When the desired height is reached, re-tighten the screws. PLEASE NOTE: the leg must always be re-tightened so the foot sits perpendicularly to the rail for the end legs, and perpendicular to the mid leg assembly for the mid feet. 20 . Floor Mount (for single rail segments) In the case of a stand alone rail segment, the rail assembly must be mounted to the floor using the supplied floor anchor bracket and (4) floor anchor screws. Repeat with other End-Leg. Floor Anchor Screw (48013)

WIRING SCHEMATIC

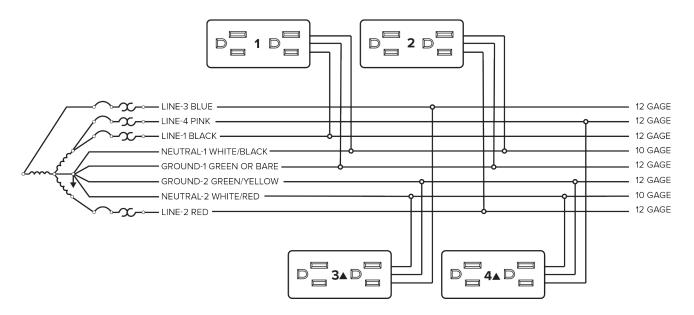

120 / 208V 3 ph

MAX 20AMPS PER CIRCUIT MAXIMUM SEGMENTS CONNECTED: 12 STANDARD POWER 6 HEAVY POWER

FOR 3+1 USE CIRCUITS 1, 2, 3, 4 ONLY

FOR 2+2 USE CIRCUITS 1, 2, 3A, 4A ONLY

WARNING: RISK OF FIRE OR ELECTRIC SHOCK. THIS OFFICE FURNISHING SYSTEM MAY BE CONNECTED TO MORE THAN ONE SOURCE OF SUPPLY. ALL SOURCES MUST BE DISCONNECTED PRIOR TO ANY SERVICING. NO SINGLE CIRCUIT MAY BE POWERED BY MORE THAN ONE SOURCE.
