

Tia Conference Table

A blend of strength and beauty.

How do you make a statement, even before the meeting begins? It starts with the Tia Conference Table. Whether you're hosting clients or brainstorming with your team, this height adjustable table provides a wide surface and refined design aesthetic. Perfect for creating a wow-worthy formal space everyone can agree on.

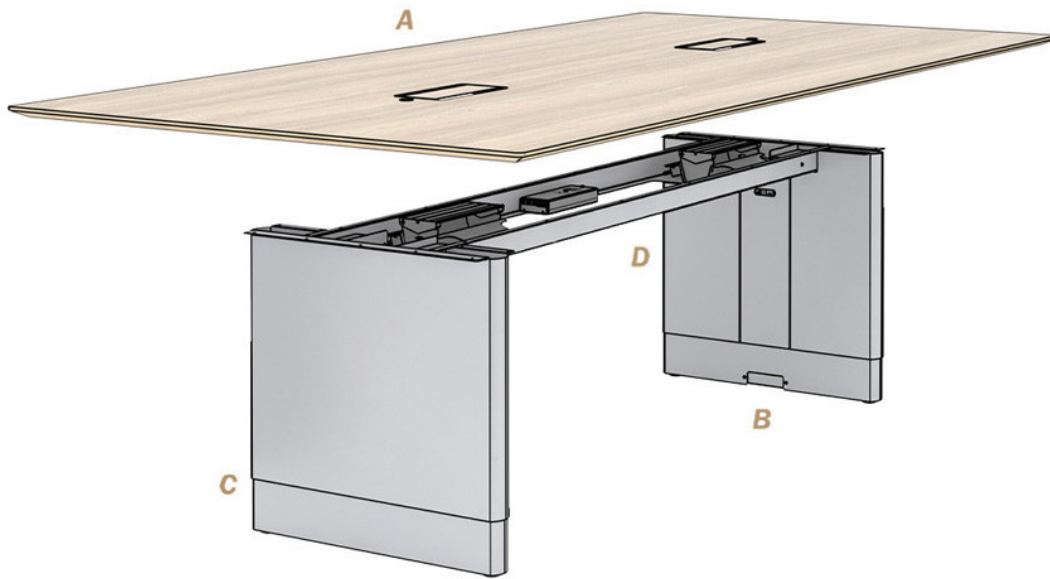

Details

Two powered lifting columns quietly elevate the table, but it's what happens behind the scenes that really makes an impact. In-surface dual-hinge lids provide easy access to power from either side of the table, while a built-in cable channel ensures cumbersome wiring is clearly out of sight.

Features

- Surface shapes in Rectangle, Boat, Super Ellipse, Tapered, and Riverstone
- In-surface power offered in three power specifications

A

- Dual embedded switches at both ends control height adjustment
- Grain-matched dual-hinge lids for in surface power allow two-sided access
- Two-piece tables are grain matched at seams
- Available in all Watson laminates and Forbo finishes

B

- Cable access hatch with integrated E-Chain wire manager inside each leg
- Single-plug power infeed with access from either side of the leg

C

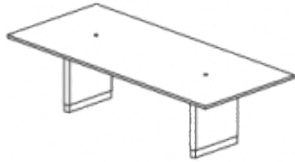

- Precision-formed steel shroud houses the lifting columns
- Height adjustment range from 28" - 47.5"
- Fixed height 29.5"

D

- Cable trough conceals and maintains system power cables
- Optional Cable Bridge facilitates floor wire management between table legs
