

Haven HighLow Tables

The Haven HighLow Tables combine two heights allowing people to choose a setting to match the occasion: high for quick, casual interactions, and low for seated work sessions. The high surface easily pivots allowing it to be configured on the fly to best fit the needs of the moment.

Details

The steel frame of the tables and bench utilize strategic angles to provide an extremely solid structure with the least amount of steel. This A-line frame creates surprising strength and visual lightness. The tables are also available with a dropdown cable tray under the table surface and a discreet cable channel that snaps onto any Haven table leg.
