Bahn Desk | Product Specification Details

Desk Base

Top support brackets are constructed of 12-gauge cold-rolled sheet steel. Glides are screwed into metal inserts that are welded into the foot. The foot is constructed from two pieces of 12-gauge cold-rolled sheet steel. The adjustment mechanism is electrically height adjustable and consists of two telescoping rectangular steel tubes. All electronics and leg movements are backed by a 10-year warranty. A 12-gauge steel utility beam connects all legs and conceals cables. All metal components are powder coated.

Worksurface

Worksurfaces that are edged with a synthetic material are 1-1/8" Thick and composed of horizontal grades of laminate that are bonded to a 1½" industrial grade NAF particleboard core. Worksurfaces are finished with high pressure laminate on the topside and a sheet of horizontal grade backing material on the bottom. Worksurface dimensions are exact sized but come standard 1" smaller than typical panel dimensions to allow for vertical movement without interference of plugs, wires, brackets and panels. Desk surfaces are fastened to the legs with steel machine screws threaded into brass inserts on the worksurface.

Edge

Reversible desks are available in three variations. The 90 profile highlights the perpendicular geometry of our principal silhouette. The 90 Natural edge is the greenest choice featuring an exposed NAF MDF core, clear-coated with a waterborne finish. 90 Trim is a 1.5mm thick synthetic edge and offers the most compact profile. The 3mm thick synthetic 90 Plus edge provides softer visual weight and a more substantial ergonomic buffer. In addition to the edges available on Reversible Desks, Single Sided desks can also be specified with the Knife profile which is exposed NAF MDF core clear-coated with a waterborne finish, or Knife Trim with 1.5mm edge banding.

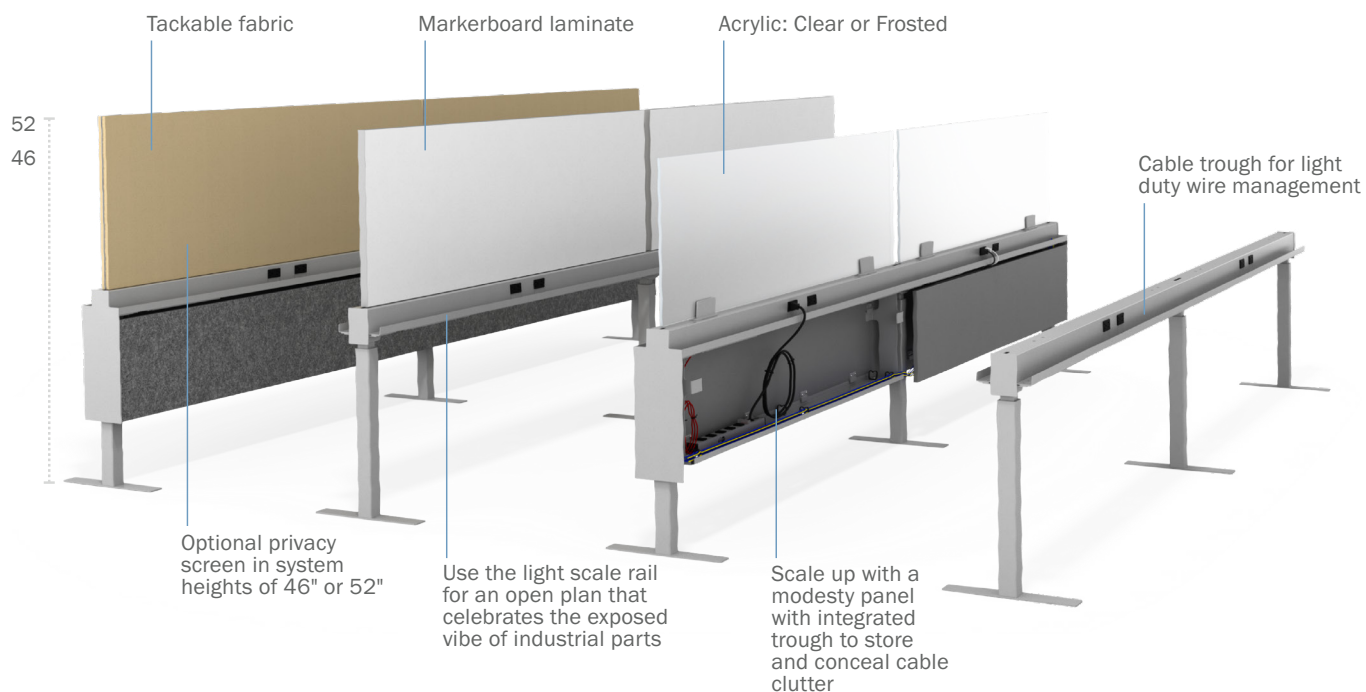

Desk Screen

The Bahn Desk Screen mounts to desk surfaces 7/8" - 1-1/4" thick with non-marring steel powdercoated clamp brackets. Wood screws are needed for knife edges. The 0" radius corner core board is constructed from a super light weight pinnable MDF with a smooth surface. The trim profile is made from aluminum extrusion to provide a refined look. A minimal gap between the screen and the edge of the desk minimizes planning size creep.

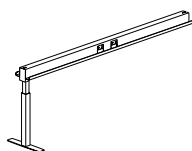

Acrylic Desk Screen

The Bahn Desk Acrylic Screen is a 3/8" thick acrylic panel with a 1/4" corner radius that comes in either a frosted or clear finish. The screen mounts to surfaces 7/8" - 1-1/4" thick using non-marring powdercoated steel clamp brackets that can be easily repositioned for routing cables or cleaning. Wood screws are needed for knife edges. A minimal gap between the screen and the edge of the desk minimizes planning size creep.

Bahn Rail | Product Specification Details

Rail

The Bahn Rail is constructed of laser cut 10 and 16-gauge cold rolled steel. Support legs are constructed from square 2" and 1.5" HRPO tube. Utilizes 8 wire 4 circuit dual insulated modular power system.

Spine Screen

The Bahn Spine Screen simply drops into the Raceway where it is secured. The 0" radius corner core board is constructed from a super light weight pinnable MDF with a smooth surface. The Spine screen supports are constructed from 14-gauge steel tubing. The trim profile is made from aluminum extrusion to provide a refined look.

Acrylic Spine Screen

The Bahn Rail Acrylic Screen is a 3/8" thick acrylic panel with a 1/4" corner radius that comes in either a frosted or clear finish. The screen mounts to the Bahn Rail using powdercoated steel clamp brackets.

Gallery End Panel

The Bahn End is constructed of 1-1/8" industrial grade NAF particleboard finished with color matched 1.5mm polypropylene edge banding. The trim profile is made from an aluminum extrusion and designed to provide a secure mounting location for accessory whiteboards and planters.

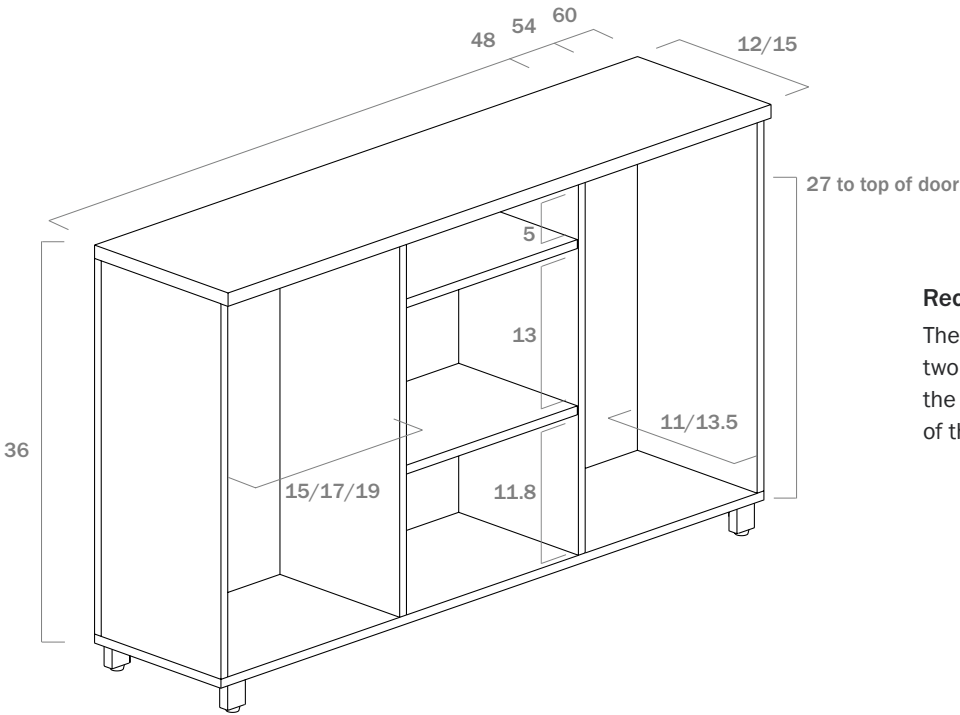

Gallery Panel Accessories

The aisle end accessories are constructed from laser cut 20-gauge cold rolled. The markerboard panel is powder coated using a special formulation of high gloss white markerboard powder tested to exceed many erase cycles.

Bahn Recycle Center

The Recycle Center may be specified with an accessory back panel. Panel options include fabric, magnetic markerboard, or metal powdercoated planters to add greenery to any space. Accommodates standard 10 gallon bins (not included with unit). Ships with waste, recycling, and compost door labels. Planters sized for 7" pots.

Edge Options

Recycle Center Interior Measurements

The Recycle Center comes in three widths and two depths. Interior measurements shown to the left are dependent on the depth and width of the specified unit.

Bahn Lockers & Cubbies

Bahn Office includes a line of multi-functional freestanding lockers that provide communal storage for team environments. Use Bahn freestanding lockers to separate activity zones or at the end of a workstation run. Full-height lockers are designed for up to four users per cabinet, likewise Bahn Cubbies can accommodate up to eight users.

Bahn Tower

The large lockable roll-out shelf maximizes vertical space and is ideal for sit-to-stand work applications or when higher side privacy is desired. The Side Tower provides concealed storage for bags, coats, books, and gear.

Optional USB ports provide convenience for charging devices and help keep the worksurface clear of clutter.

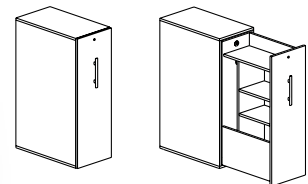

The Side Tower is freestanding, and handedness can be reversed in the field, responding to change and growth in the workplace.

Bahn Locker interior Shelves and Coat Hooks

All Bahn Lockers are equipped with a shelf and two hooks to allow for convenient storage of personal belongings. The hook on the rear interior wall is perfect for hanging a backpack or purse, while the side hook is ideal for hanging your coat. The shelf provides an ideal storage space for wallets, keys jewelry or any other small personal items. Locker doors also come standard with nameplates

Bahn Storage | Product Specification Details

Side Tower

The Bahn Side Tower top panel is made from 3/4" thick laminated industrial grade particleboard. The cabinet shell, face, and internal partitions are constructed of 3/4" thick laminated industrial grade NAF particleboard finished with color matched 1.5mm polypropylene edge banding. The interior of the cabinet is finished in Fashion Grey to complement your choice of case finish from Watson's standard case finish offering. The interior roll-out shelf handedness can be reversed in the field by removing and installing on the opposite side.

Mobile Storage

The Bahn Storage tops are made from either 1-1/8" M2 industrial NAF particleboard or 27mm double refined NAF MDF finished with high pressure laminate. The cabinet shell, face, and internal partitions are constructed of 3/4" thick laminated industrial grade NAF particleboard finished with color matched 1.5mm polypropylene edge banding. All Credenzas and Towers are non-handed, making them flexible pieces for the agile office.

Work Island Storage

The cabinet shell, face, and internal partitions are constructed of 3/4" thick laminated industrial grade NAF particleboard finished with color matched 1.5mm polypropylene edge banding. All units are non-handed or back to back mirrored for a modular construction. The units ship individually and are united to base and top in the field using a modular connection pattern. The bases mount using confirmat screws and the tops mount via a metal to metal connection. All bases come equipped with 3" industrial grade casters to move easily even with heavy loads.

Storage Tops

Worksurfaces are made from either 1-1/8" M2 industrial NAF particleboard or 27mm double refined NAF MDF and finished with horizontal or post-form grade high pressure laminate and a horizontal grade backer sheet for balanced construction. The laminates are cold press bonded using Wilsonart 3100 PVA ultra-low VOC adhesive. The 90 profile highlights the perpendicular geometry of our most traditional silhouette. The 90 Natural edge is the greenest choice featuring an exposed MDF core, clear-coated with a waterborne finish. 90 Trim is a 1.5mm synthetic edge with a nominal reveal for the most compact edge profile.

Locker Storage

The cabinet shell, face, and internal partitions are constructed of 3/4" with color matched 1.5mm polypropylene edge banding material. The cabinet panels are joined with robust 8mm hardwood glued dowel connection. Single case construction makes installation and leveling a breeze. The electronic lock is GUUB Model P122EV/CM01 semi-flush mount, satin silver, 4-button with a turn knob. The long-life Lithium button cell (CR2032) averages a three-year life. No tools are necessary to replace the battery. In the event the battery dies and there are no batteries on hand, a USB charging cable can be used to power up the lock and open the door. The capacitive touch switch is easy to clean and requires minimal maintenance.

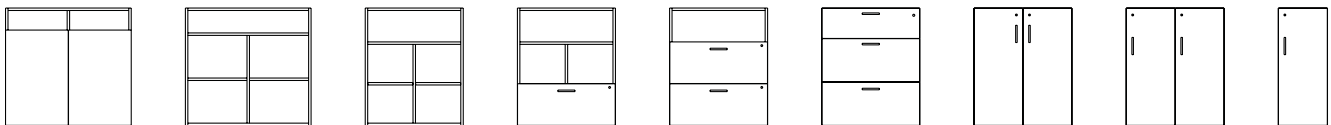

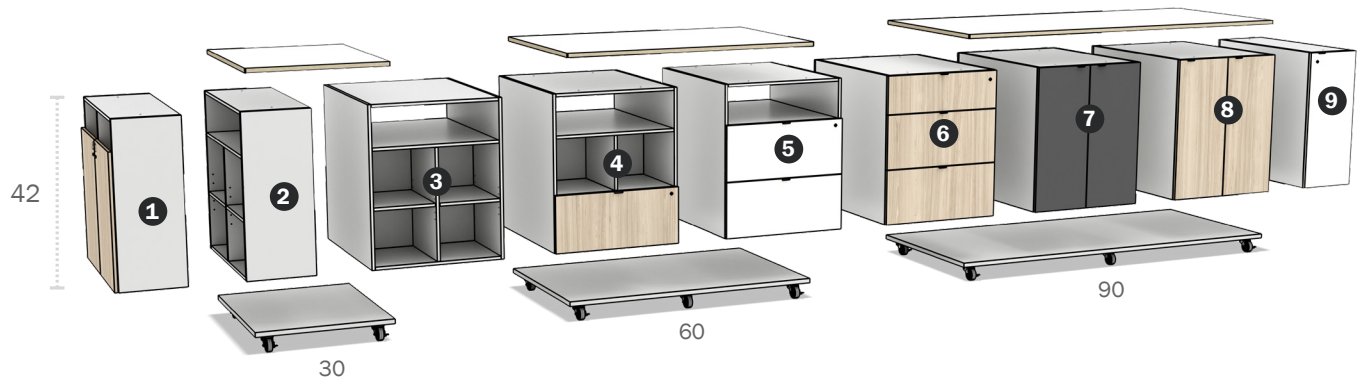

Locks

Bahn Lockers have the option of keyed locks or digital locks with "Guest" or "Resident" settings. Keyed locks can be specified one of three ways; factory installed "L," non-locking "N," or field installed "U." "L" locks are keyed randomly and factory installed. The non-locking "N" option keeps drawer and door faces clear when locks are not required. Field installed "U" locks are keyed alike upon installation in the field.

Digital Lock Function

- **Resident Lock** - Enter user code and it remains until reset
- **Guest Lock** - Enter user code to lock and unlock only once
