Tia

SYMMETRY, BALANCE AND PRODUCTIVITY

watson

Built to Adapt, Designed to Thrive

The Tia Collection makes change look good and feel easy. Flexing to accommodate individual and group work (and sitting or standing preferences), Tia's adaptable platform is designed to transform any workspace into an inspiring hub of productivity. Equipped with seamlessly integrated technology, streamlined cord management, and a design ethos grounded in balance and symmetry, Tia thrives from the executive suite to the modern conference room.

Get in the Flow

With a nuanced balance of form and function, **Tia Office** is designed for the needs and ambitions of the next generation of go-getters. Its height-adjustable platform allows you to go from sitting to standing with the simple touch of a button, and seamlessly switch from solo-focused work to a collaborative meeting with its generous work surface.

Store in Style

Select from three secondary storage types:
Stacker, Locker and Wardrobe.

Subtle Touches

Fully incorporated into the drawer's facade, the Cove Pull delivers a sleek, understated look that feels intuitive to use.

Effective Details

Clean lines crafted from premium materials house thoughtful features like a flush-mounted control switch and a dedicated power dock. Coupled with concealed but accessible cabling, Tia makes transitioning between tasks the smoothest part of your day.

Blending Strength and Beauty

Make a statement even before the meeting begins with the **Tia Conference Table**. Whether you're hosting clients or brainstorming with colleagues, this height-adjustable table sets the stage with a sophisticated aesthetic and funtional touches. Available in a breadth of surface shapes and finishes, Tia creates a refined, invigorating space.

High-Performing Features

Two powered lifting columns quietly elevate the table, but it's what happens behind the scenes that really makes an impact. In-surface dual-hinge lids provide easy access to power from either side of the table, while a built-in cable channel ensures cumbersome wiring is out of sight. Additionally, dual embedded switches at each end of the table offer easy height control, empowering anyone to adjust the surface to their liking.

Collaboration Central

The go-to place for getting things done, the **Tia Team Table** is the media-ready hub where concepts and collaboration thrive. With the optional monitor mount you can easily meet and share visuals with both on-site and remote team members, while its height-adjustable surface ensures meetings are energized and on-task.
