Allé Work Desk

Edge options

-  Allé 90
-  Allé 90 Ply
-  Allé 90 Trim
-  Allé 90 Trim Square Corner
-  Allé Knife
-  Allé 90 Knife Trim
-  Allé 90 Knife Ply
-  Allé Round Under
-  Allé 90 Round Under Ply

Allé surfaces are 3/4" thick.

Work Desks include cable clips under the surface. If additional cable management is required, add the universal cable tray (WAWH)

Desk surfaces are net sized. Actual dimensions are 1" less than the specified width and depth of the surface.

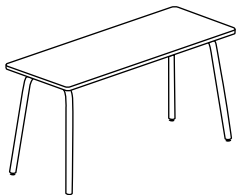

Optional user power can be specified as convenience power (clamps onto the back of the desk) or utility power (secured to the universal cable tray).

Allé Work Desk

Cable Channel

The Vertical Cable Channel can be attached to the legs of work desk and meet tables to discreetly route cables from the surface to the floor. ([Learn more here](#))

- Easily clips on without need for hardware

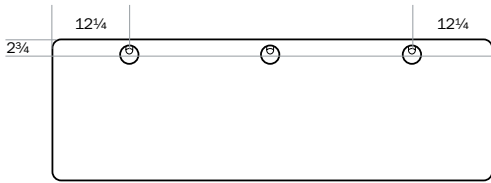

Casters

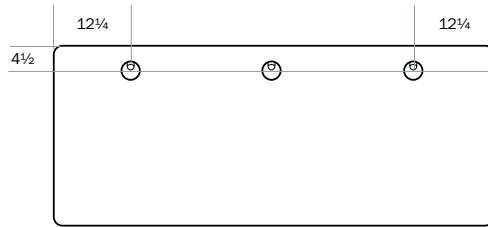

Casters are optional for increased mobility and are available in white or black. The overall height of the desk is maintained at 29.5"

Grommet Locations

All grommets are sized at 60mm in diameter, constructed of black plastic and come standard with a grommet cover. For alternate grommet locations, you can order DAGR grommets (comes as set of 5 when ordering quantity of 1) separately and install them in the field.

Rectangle, 24" D

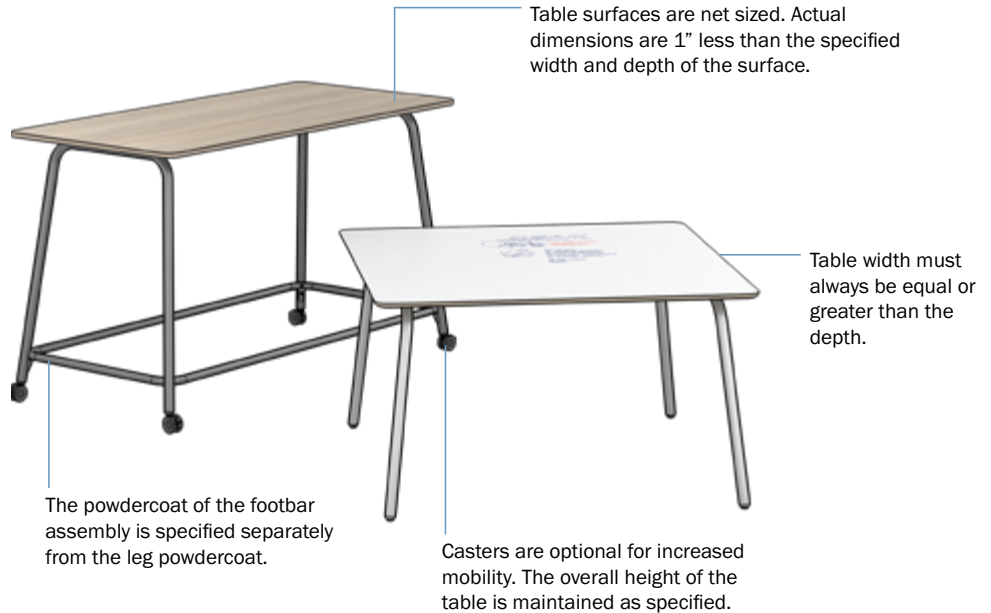

Rectangle, 30" D

All desks can be specified with grommet(s) left, right, or centered.

Cable Channel

The Vertical Cable Channel can be attached to the legs of work desk and meet tables to discreetly route cables from the surface to the floor. ([Learn more here](#))

- Easily clips on without need for hardware
- Options for each Meet Table height

Casters

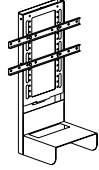

Casters are optional for increased mobility and are available in white or black. The overall height of the table is maintained as specified.

Allé Meet-Up Table

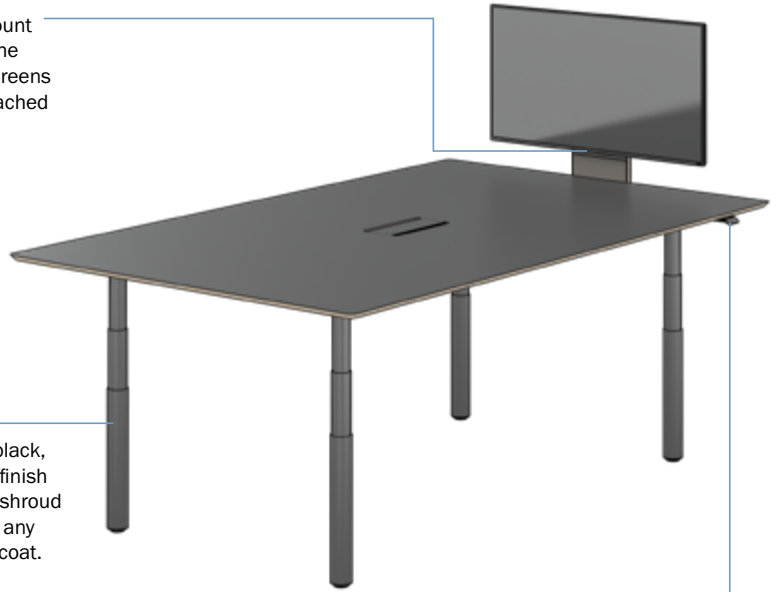

Edge options

-  Allé 90
-  Allé 90 Ply
-  Allé 90 Trim
-  Allé 90 Trim Square Corner
-  Allé Knife
-  Allé 90 Knife Trim
-  Allé 90 Knife Ply
-  Allé Round Under
-  Allé 90 Round Under Ply

The universal monitor mount (FLAV) can be added to the meet-up table. It holds screens up to 55" and can be attached to any side of the table.

Lifting columns come in standard powdercoat of black, white or silver. If another finish is desired, an outer steel shroud is added and available in any standard Watson powdercoat.

The Meet-up Table includes 2 switches for height adjustability, which are located on the right end of each side of the table width. Specify an embedded or paddle switch to adjust the table height.

A single drop in power unit can be added to the center of the table. See page 9 for standard meeting and conference power options.

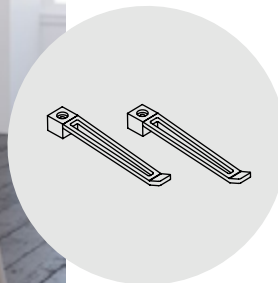

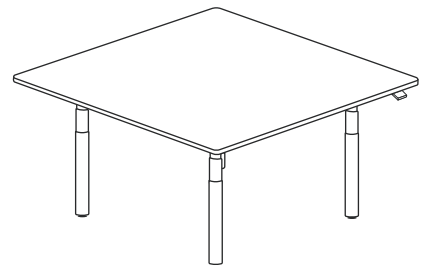

Meet-Up Table

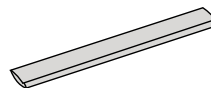

D: 60

W: 60, 72, 84, 96

HA: 23 - 49

The Meet-Up table comes standard with cable clips. If additional cable management is needed, select from the options below.

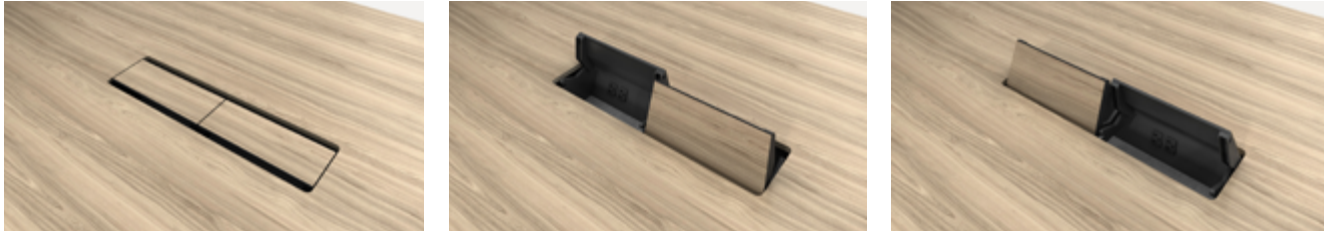

If the table is next to a gallery end panel with power, specify the fabric cable sleeve WACMF43.

For a freestanding application, specify the WHACM cable manager.

Allé Conference and Meeting Power

The Dual-hinge power unit is Watson's unique 2-way access to Allé in-surface power/data. Lids are grain-matched to the worksurface and house ample space beneath for excess cables and remotes. Available in a single unit, or double unit (XL, shown below) depending on power/data needs.

Available in the following three power/data configurations:

Dual-hinge Full

3 Power
USB A+C
1 HDMI
1 CAT6

Dual-hinge Basic

Commercial 4 power plug strip
1 HDMI
1 CAT6
10' Cord

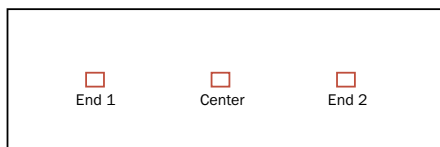

Dual-hinge Open (no power)

1 HDMI
1 CAT6

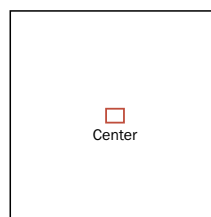

Power Locations

Meet Tables surface can be specified with a drop-in power unit, centered along the surface depth. See the full range of Watson's standard meeting and conference power options on page 31 of the pricer.

Meet Table

Meet-Up Table

- Dual-hinge is only possible in the Center location
- When width is 66" or greater, End 1 and End 2 become available with exceptions which can be fully specified in CET

Work Desk / Meet Table

The Work Desk and Meet Table come with a worksurface top constructed from any of the following core materials depending on options: 18 mm European birch multi-ply plywood with a waterborne edge stain, ¾" double refined NAF MDF with a waterborne edge stain or ¾" M2 industrial NAF particle board with a 1.5mm polypropylene edge band. All of these core materials are finished with either horizontal or post-form grade high pressure laminate or Forbo furniture linoleum on the top face and a horizontal grade backer sheet for balanced construction.

The frame has two fixed height bent tube bridge legs tied together with horizontal support tubes fastened to the underside of the worksurface. Both the bridge legs and the support tubes are composed of 40mm steel tube.

A threaded cast aluminum insert mates with the bottom end of each bridge leg and accepts either a pivoting head glide with 30mm of stem length adjustment or a 65mm diameter swivel caster with locking capabilities.

The optional foot bar available on Meet Tables at heights of 36" and 42" consists of four 1.25" steel tubes and a cast aluminum connector that mechanically fastens to each of the four legs.

The Work Desk is compatible with an undersurface mounted cable tray constructed of bent 16 gauge cold rolled steel. The cable tray is optioned with a Tripp Lite 4 outlet power distribution unit and includes strain relief mount points for cable bundling and organization. (Sold separately)

Meet-Up Table

The worksurfaces are available in a core material type of 0.75" NAF MDF, 0.75" NAF particleboard, or 18mm Euro birch plywood and is available in all standard surface finishes. Support rails are comprised of bent 12-gauge cold rolled steel and 1.25" x 2" tubing. The support rail reinforces the worksurface from the underside. It is mounted directly to the underside of the worksurface through brass inserts and lifting columns and the control box mount directly to support rail. There are 3 switch options to control the lifting columns: an embedded button, a Display Paddle switch with Bluetooth connectivity, or a standard Paddle switch with Bluetooth connectivity. The bottom of the legs are shrouded with a 3" hollow steel tube if the power finish isn't frosty white, black, or silver.

Mobile Planter

Without the planter trays, the mobile planter can be used for storing and organizing reference materials and supplies.

Optional planter trays (always black) complete the unit and provide a waterproof insert for the sheet metal troughs. Planter trays accommodate 5.25" diameter pots or can be planted in directly.

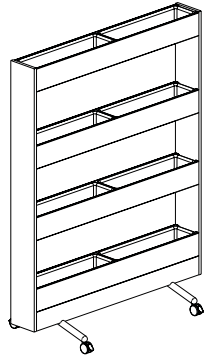

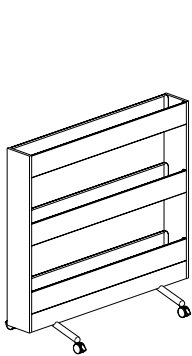

Wheels can be either black or white.

Mobile Planter

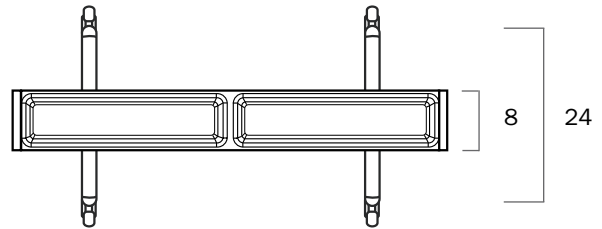

D: 24" (including base)

W: 55"

H: 3 Tier: 52" H, 4 Tier: 72" H

*shown with optional planter trays

Mobile Monitor Wall Details

The Mobile Monitor wall is available in two widths which determine the largest possible tv monitor size they can accommodate.

56"W x 72"H x 24"D for up to 55" Monitor
 68"W x 72"H x 24"D for up to 65" Monitor

Excess cord can be looped around the integrated cord manager to keep it up off the floor.

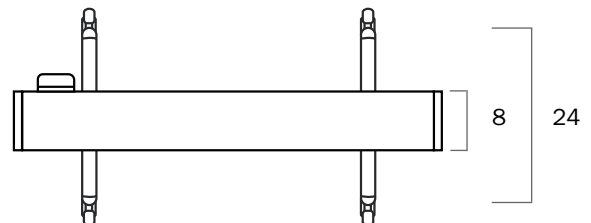

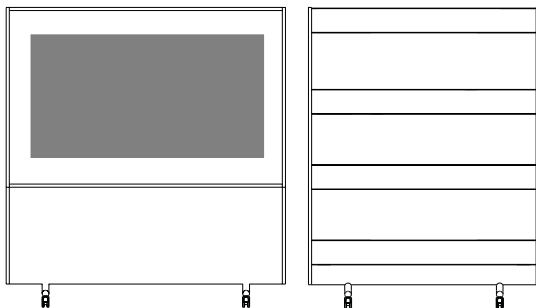

Integrated A/V mount supports a wide range of VESA mounting patterns (max 600 x 400mm) and flexibility in monitor mounting locations.

Optional convenience power can be specified to provide HDMI, USB A+C and 2 simplex mounted below the monitor.

The mid panel is inset from the edge of the case by 3". To ensure the tv does not extend beyond the case, select a shallow depth tv monitor.

The back side of the mobile monitor wall features a tackable fabric panel. Behind this panel is a utility power strip with 4 simplexes.

- When placed side by side, the Mobile Monitor Wall and the 4 tier, 72"H Mobile Planter align creating functional space division.

Mobile Planter

The lower horizontal panels and side vertical panels on the Mobile Planter are built from wood composite board that is 100% recycled industrial by-product from local milling operations located within our Pacific Northwest region. The wood board contains 90-95% recycled content that in turn may be recycled again. Boards are finished with GreenGuard™ certified laminates. Laminates are fused to surfaces using water-based, non-toxic and ultra-low VOC emitting adhesive.

The pair of mobile legs mechanically fasten to hardware embedded in the lower case assembly and are tied together with an aluminum extrusion housed inside of the assembly for additional support. The legs are composed of 40mm steel tube, and 65mm diameter swivel casters with locking capabilities that thread into cast aluminum end caps.

Optional black high impact polystyrene (HIPS) plastic planter trays provide a sturdy and waterproof container for planter pots up to 5.25" in diameter or allow for direct planting inside of the tray.

The planter trays nest inside troughs that are composed of bent 16 gauge cold rolled steel. These troughs are mechanically fastened to the side vertical panels.

Monitor Wall

The Monitor Wall is built from wood composite board that is 100% recycled industrial by-product from local milling operations located within our Pacific Northwest region. The wood board contains 90-95% recycled content that in turn may be recycled again. Boards are finished with GreenGuard™ certified laminates. Laminates are fused to surfaces using water-based, non-toxic and ultra-low VOC emitting adhesive.

The pair of mobile legs mechanically fasten to hardware embedded in the lower case assembly and are tied together with an aluminum extrusion housed inside of the assembly for additional support. The legs are composed of 40mm steel tube, and 65mm diameter swivel casters with locking capabilities that thread into cast aluminum elements.

Each Monitor Wall comes standard with a Tripp Lite four outlet power distribution unit (PDU) located behind the removable fabric panel on the backside of the upper case assembly. An additional convenience power unit is also optionable. The in-surface power solution unit mounted into the front panel of the unit (situated directly beneath the monitor) that features two power outlets, HDMI, and a combo USB-A + USB-C ports. The system integrates to a three outlet Triplex unit (instead of the standard Tripp Lite PDU) also behind the removable fabric panel on the backside of the upper case assembly.

A tackable, removable fabric panel is located on the backside of the upper case assembly. The fabric panel is constructed from two pieces of 12mm LDF wrapped in fabric using a non-VOC emitting rubber emulsion Simalfa glue.

A bent 12 gauge cold rolled steel cable manager bracket mechanically fastens to the backside of the lower case assembly. The powder finish of this bracket matches the finish selected for the mobile legs.

An AV mounting solution is mechanically fastened to the center panel of the Monitor Wall. It is constructed of bent 12 gauge cold rolled steel brackets. The mount accommodates a max VESA mounting pattern of 600x400mm.

Mobile Pin + Write Boards

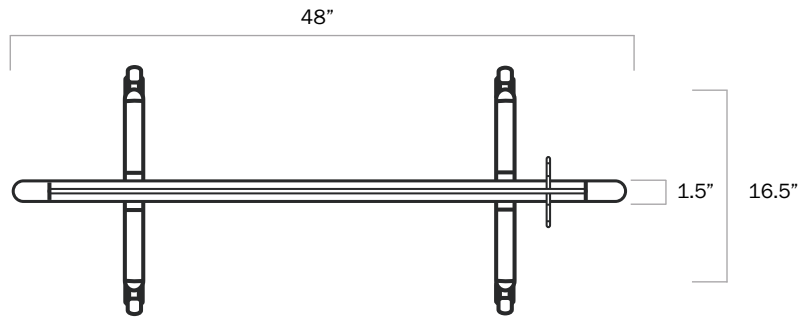

Mobile Boards can be specified in a single material or a combination of tackable fabric or magnetic markerboard faces.

Mobile Pin boards are available in any standard Watson Fabric.

The mobile boards are lightweight and easy to move. Four locking casters (65mm) are available in white or black.

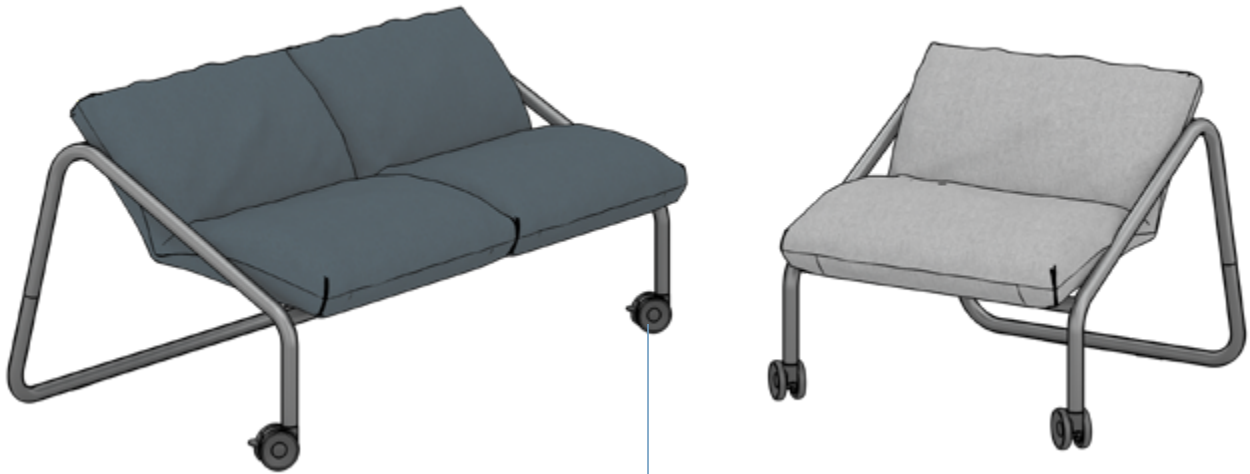

A PET coathook is included with each mobile board and comes in Light Gray when white casters are selected or Charcoal when black casters are selected.

- Mobile boards can be offset and nested to save space.

Sofa

The Sofa(s) feature oversized 100mm front, locking casters (available in black) to allow for ease of mobility.

The Hopper, Sofa and Sofa Single are offered in a limited selection of upholstery fabrics:

Pin and Write Boards

The frame of the Pin and Write boards are comprised of 6063-T6 aluminum extrusions mechanically fastened to cast aluminum corner connectors. The core board is comprised of a stack of recycled corrugated cardpaper layers providing excellent tackability and lightweight transport. Depending on product optioning, this core board will be covered by fabric or a magnetic markerboard sheet metal adhered with non-VOC emitting rubber emulsion Simalfa glue.

The pair of mobile legs mechanically fasten to the lower horizontal frame extrusion. The legs are composed of 40mm steel tube, and 65mm diameter swivel casters with locking capabilities that thread into cast aluminum end caps.

Each board comes standard with a black or gray PET felt coat hook that press-fits into a slot in the upper horizontal frame extrusion.

Sofa

The frame consists of three bent 40mm steel tube pieces that are connected by POM plastic press-in fittings. A 40mm steel horizontal support tube is mechanically fastened to the bent tube frame. Two 100mm diameter locking black swivel casters are secured into POM plastic fittings on the front side of the Sofa.

Depending on optioning, the Sofa contains one or two sewn assemblies consisting of an outer polyester fabric, a 3D polyester non-slip support mesh fabric, and zippers for easy access to the cushions. The cushions are 100% polyester fill. In the case of a two cushion Sofa model, the cushions are secured together in the middle of the unit by two hook and loop fastening straps located on the underside of the sewn assembly. Recommended weight capacity of 240lbs per cushion.

Hopper

The frame is a welded assembly consisting of two 1.25" bent steel tube pieces, 0.188" steel end plates, and a bent sheet metal support bracket. The cushion features a high-density non-fire-retardant polyurethane foam cushion molded over a plywood core. This cushion assembly is then wrapped in polyester fabric. A plastic press-in fitting glide at the bottom opening of each leg features a soft PET felt cap for a non-skid surface. Rubber press-in bumpers located on the inside of each leg prevent marring while stacking. Recommended stacking limit of no more than 3 high. Recommended weight capacity of 240lbs.
